## Gothic Arch Greenhouses are Beautiful and Functional

Our beautiful Gothic Arch Greenhouses are classically designed and engineered from top quality, hand selected materials, providing decades of dependable service.

The graceful Gothic arch is a clean, energy-efficient design with exceptional strength to protect against excessive rains, high winds and heavy snows, while providing maximum light and heat transmission for your plants.

Available in a wide variety of sizes, are prefabricated greenhouse kits come in free-standing, attached and lean-to styles. They may also be custom designed to your exact specifications.

The Gothic framework is hand selected and carefully produced from long-lived heart cypress—a solid wood, renowned for its natural insect and decay resistance and warm, energy-efficient rich beauty. Easy and satisfying to work with, our greenhouse frames are fully warranted against defective workmanship and materials for 10 years.

The glazing systems offered are a single layer corrugated polycarbonate, a double-wall polycarbonate and a triple-wall polycarbonate. These superior grade rigid plastic glazing panels allow maximum light and heat transmission without harsh shadows or “hot spots.” They carry a 10-year warranty.

## Gothic Arch Greenhouses Come as a Complete Kit

You get everything complete and ready for assembly with your Gothic Arch Kit—construction hardware includes galvanized fasteners, silicone caulking, weather stripping, aluminum or galvanized ridge flashing etc.

To compliment the Gothic Arch Greenhouse and to allow for year-round service, we offer a complete line of options: heating, ventilation, evaporative cooling, shade cloth, benches, hanging basket supports, and irrigation systems... all tailored to your specific requirements.

Many of our customers choose to build a raised foundation form materials that match their homes or landscaping. This provides added height for taller specimen plants and hanging baskets.

## Gothic Arch Greenhouses are Economical and Easy to Build

Strong, beautiful, energy-efficient, and affordable, our quality Gothic Arch Greenhouse kits cost less than you would pay locally for the same component parts, if they were available. You save time and money with a Gothic Arch Greenhouse because you build it yourself quickly and easily with basic carpentry tools.

## Gothic Arch Greenhouses can be used Anywhere

Thousands of our Gothic Arch Greenhouses are being used each and every day throughout the country by commercial growers, vocational and rehabilitation instructors and backyard enthusiasts.

Used for everything from swimming pool and hot tub enclosures, to attached sunrooms and solar collectors, garages and cottages - the Gothic Arch Greenhouse is the most functional, versatile, attractive and affordable structure we know of. Our customers feel the same way.

## A Few Comments from our Satisfied Customers

"I purchased a Gothic Arch kit from your company in 1972 and am pleased to report it is still standing and works as well as the first day I used it. I left it on my father's property and now am interested in acquiring a Gothic Arch for my own property." Mr. T.J., Helena, Montana

"Your greenhouse can sure take it. We had gusts of wind up to 110 mph last night and it didn't even shiver." Mr. W.A., Wiscasset, Maine

"Our greenhouse is now one year old and has given us many hours of pleasure...truly great therapy." Dr. R.L.S., Valdosta, Georgia

"I'd like you to know that the Gothic Arch Greenhouse withstood the high winds of Hurricane Frederick amazingly well. The winds hit between 115-145mph here off Gulf Shores. Thank you for a fine product. Mr. E.G. Foley, Alabama

"I just had to drop a note telling you how much we are enjoying our new Gothic Arch Greenhouse. It is everything you promised and everything we hoped for. Thanks again for turning out a quality product!" Mr. J.D., Houston, TX
